1 Introduction

The dissemination kit is a collection of material (texts, images and videos) which the Commission may use for its own dissemination of project results.

The materials are available for download from the project website's Project Public Deliverables page as a zip file 'D8.7 Dissemination Kit':

<http://www.razipol.eu/public/index.html>

1.1 Project Presentations

The initial project presentation is included in the kit; this explains in detail the plans for the project and the roles of each partner. An updated second project presentation also forms part of the materials for the dissemination kit, this outlines the main results from the project.

1.2 Project videos

Two project videos were produced for the RAZipol project; the first describes the project plans at the outset and details the involvement of each partner. In the second video the Project Coordinator describes the progress made and the project results.

1.3 Project Newsletters

Three annual newsletters have been produced for the project, describing the current status of the work, major results at each stage, and the activities of the partners.
